EXECUTIVE SUMMARY:

Country Manager and enterprise technology leader with 20+ years of experience leading B2B technology, SaaS, digital transformation, customer delivery, strategic accounts and operational scale-up across Mexico and Latin America. Currently leading Redsis Mexico with responsibility over country strategy, commercial planning, enterprise pipeline, field operations, KPI governance, team growth and organizational transformation. Proven ability to recover critical services, stabilize strategic accounts, build operating models and align commercial execution with technical delivery.

Core Leadership Capabilities

Country Strategy & Operating Model | Enterprise B2B Sales | Strategic Accounts | Customer Delivery & SLA Management | P&L Discipline & Forecasting | Team Scale-Up | Organizational Transformation | AI-Enabled Automation

Selected Executive Impact

- Scaled Redsis Mexico from **13 to 23 people in less than one year**, with an active hiring plan expected to reach **36 people by July**.
 - Recovered a major retail field-support operation, reducing overdue incidents from **293 to 3** within five months and sustaining SLA performance between **98% and 100%**.
 - Protected a strategic ATM services operation at risk of installed-base reduction by identifying service-chain gaps, reframing accountability and stabilizing business continuity.
 - Designed and implemented a logistics billing automation workflow handling **400-800 weekly purchase orders**, reducing manual preparation from **1-1.5 days to minutes**.
-

PROFESSIONAL EXPERIENCE:

Redsis México

Aug 2025 – Present

Country Manager | Mexico – Lead Redsis Mexico's country operation, focused on enterprise technology services for retail, banking, field support, POS, ATMs, peripherals, store infrastructure, service delivery and technical operations.

- Own country-level strategy, commercial planning, enterprise pipeline, customer delivery, field operations, KPI governance, organizational structure and business growth initiatives.
- Built the FY2026 country operating plan, integrating commercial forecast, gross profit, OPEX, hiring, warehouse capacity, field support tools, spare-parts stock and enterprise opportunities.
- Scaled the Mexico organization from 13 to 23 people in less than one year, with an active hiring plan expected to reach 36 people by July across administration, warehouse, project coordination, commercial roles, implants and field support.
- Recovered a major retail field-support operation inherited with a significant overdue backlog; reduced overdue incidents from 293 to 3 within five months, exceeded the 90% SLA target and sustained SLA performance between 98% and 100%.
- Protected a strategic ATM services operation at risk of installed-base reduction by identifying operational gaps across the service chain, reframing accountability and stabilizing business continuity ahead of contract renewal.
- Developed a land-and-expand relationship with a major restaurant group, moving from an initial POS rollout to a strategic recurring-support contract currently under documentation.
- Designed a scalable operating model and organizational transformation agenda covering role clarity, career paths, process discipline, inventory governance, change adoption and culture of execution.

El Cedro – Transportation & Logistics

May 2023 – Aug 2025

Technology & Digital Transformation Lead / Advisor | Mexico – Led technology transformation initiatives for a transportation and logistics company, focused on SaaS evaluation, process modernization, workflow automation and scalability.

- Led the benchmark, selection and deployment of a Transportation Management System, replacing a legacy platform and enabling integrated logistics, operations, maintenance, warehouse, purchasing, treasury, accounting and finance capabilities.
- Designed and implemented a logistics billing automation workflow handling 400-800 weekly purchase orders, reducing manual preparation from 1-1.5 days to minutes while improving validation, traceability and error control.
- Supported digital transformation through AI-enabled and no-code automation workflows, process redesign and infrastructure modernization.

Grupo Salinas / UPAX – B2B Web & Mobile Apps

Nov 2021 – Nov 2022

New Business Development Manager / National Product Sales Manager | Mexico— Led the creation of UPAX's B2B technology commercial function, building the sales strategy, processes and pipeline required to launch web and mobile solutions to external enterprise customers.

- Built the commercial structure, go-to-market processes and prospecting channels to sell technology products and services outside Grupo Salinas.
- Coordinated with internal stakeholders across product, technology and delivery to prepare proposals and align solutions with customer needs.
- Developed a qualified enterprise pipeline of more than USD 1.5M.

SoftwareONE – IT Services

Nov 2018 – Jan 2021

Solution Specialist | Mexico – Structured technology solutions to help enterprise customers maximize software investment, improve governance and align technology decisions with business priorities.

- Managed strategic customer relationships in the financial sector and collaborated with product, commercial and internal teams to position enterprise technology solutions.

Oracle – SaaS / On-Premise Software Solutions

Mar 2013 – Jun 2018

Digital Transformation Consultant | Mexico – Led SaaS adoption, supply chain modernization and software asset initiatives for enterprise customers across manufacturing, transportation, financial services and retail.

- Designed digital transformation and SaaS adoption strategies, supported cloud-based supply chain modernization, and coordinated initiatives with partners, commercial teams and legal stakeholders.

Integración de Negocios – Software Development

Jan 2008 – Mar 2013

Process & Project Manager | Mexico / Brazil – Managed software implementation and IT projects focused on stability, efficiency and mission-critical operations.

- Managed software implementation and mission-critical IT projects for public-sector and enterprise customers, including RENAPO, Banco do Brasil, TV Globo and CISEN.

DaimlerChrysler de México – Software Development

Jul 2003 – Dec 2007

E-Business Specialist – Developed and managed enterprise applications in collaboration with international teams.

- Developed enterprise applications and led billing automation initiatives in collaboration with international teams in the United States and India.
